

INFINITI EXTRUSION TECHMAC

Manufacturing Plastic Extrusion Machinery & Equipment

Company Profile

Company Overview

Infiniti Extrusion Techmac was established to offer a diverse array of the most advanced plants and machine. Its strategic location at Silvassa, Dadra and Nagar Haveli, assist it to cater to the needs of domestic as well as international markets. The progressive value adopted by us has helped us achieve the utmost success and grow tremendously. Infiniti Extrusion Techmac is constantly adapting to the changing environments and modifying its product range to stay ahead in the market.

Mission

We aim to offer premium quality products and best-in-class after-sales services to its customers.

Vision

To maintain a consistent quality of product offerings that comply with the high standards as per the company norms.

Objective

To ensure strict quality controls and minuscule deficiency in manufacturing.

Strength

They have a legacy of operating in the industry for more than 10 years. This provides them with immense experience in developing as a phenomenal manufacturers and exporters.

Manufacturing Plastic Extrusion Machinery & Equipment

Our immense experience in the market segment has enhanced and evolved our technical knowledge of the production techniques and technology which has helped us in making a high standing for our brand in the market.

1. Technologically Advance Technology

To offer world-class and high standard products to our clients, Infiniti Extrusion Techmac uses technologically advanced technologies. It also helps to essentially stand out amongst peers.

2. Expert Professional

Infiniti Extrusion Techmac has a team of highly experienced professionals who help us manufacture a premium range of products catering to the needs of national and international markets.

3. In-house Quality Testing

Our Objective to offer premium quality products induces us to follow stringent quality checks at various stages of manufacturing process.

4. On-time Delivery

With an objective of customer orientation, we believe in providing on-time delivery with highly customised products to make customers experience value for money.

5. Transparency

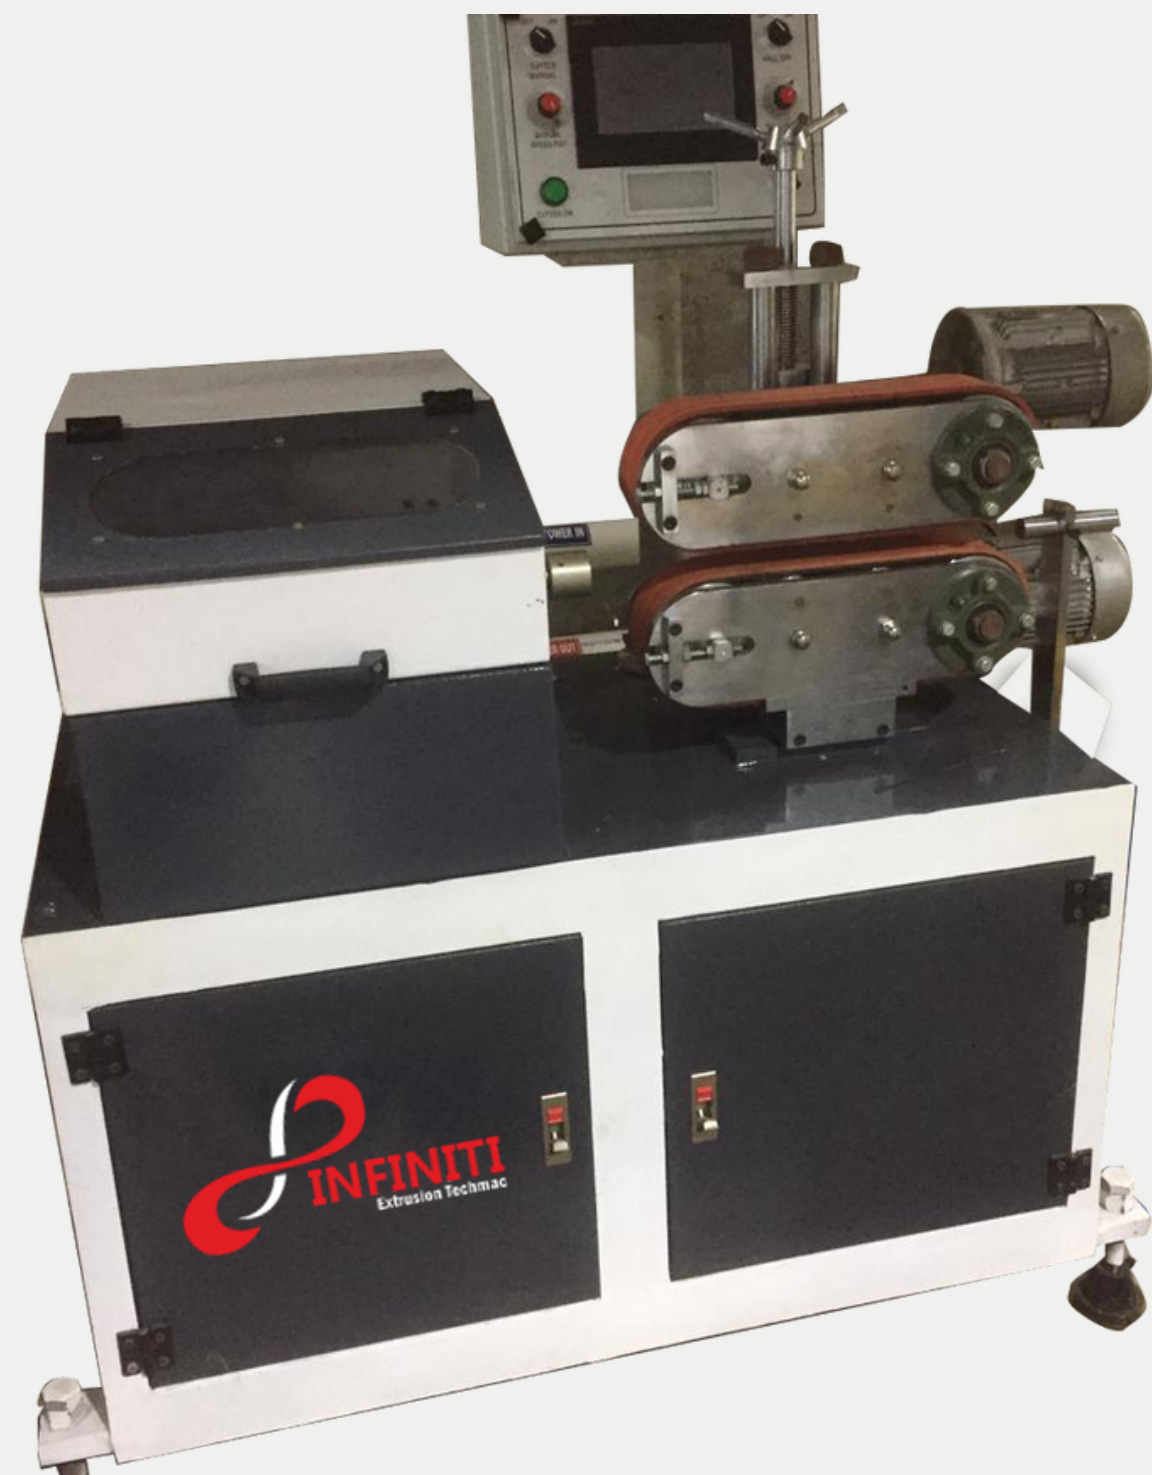

Infiniti Extrusion Techmac believes in a seamless and transparent working system which helps builds trust and long term relationship with our customers.

Quality Assurance

It is our prime goal to maintain a consistent quality that complies with the high standards set in our company's norms. We have a team of expert quality controllers to check the entire manufacturing and packaging process. This helps us in detecting and fixing any kind of deficiency or fault prior to its delivery. We also follow a stringent process to ensure the raw materials and components used in the production process are reliable and of high standards.

PRODUCTS

An insight into our Product Portfolio

Refill Tube Cutter

A cutting device for plastic refill tube cutter for use principally in the aid of plumbing, swimming pool and spa installations. The refill tube cutter is designed specifically to be used or attached to a hand held drill motor of the type which tradesmen commonly carry and use for drilling holes and setting screws

Polymer Pencil Machine

Driven by a vision to achieve significant growth in this industry, we are providing a premium quality array of Polymer Pencil Making Machine.

Features:

- Precisely engineered

Lead Extruder

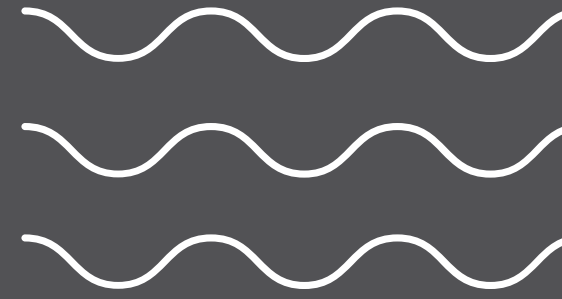

Lead coating is one of the best materials to improve the service life of high voltage cables.

The continuous extruder is mainly used to cover wire and cable with lead or to cover rubber pipes with lead vulcanization.

High Speed Mixture

Our High Speed Plastic Mixer is suitable for all the types of plastic materials and widely used in plastic process industry.

Die Face Compounding Plant

We are the largest firm delivering best series of Compounding Plant With Die Face Cutter. These products are much appreciated for its smooth operation, excellent finish, low maintenance, long service life and dimensional accuracy. It is fabricated using tough and sturdy materials that give excellent resistance to wearing, corrosion, chemicals and abrasion.

Features:

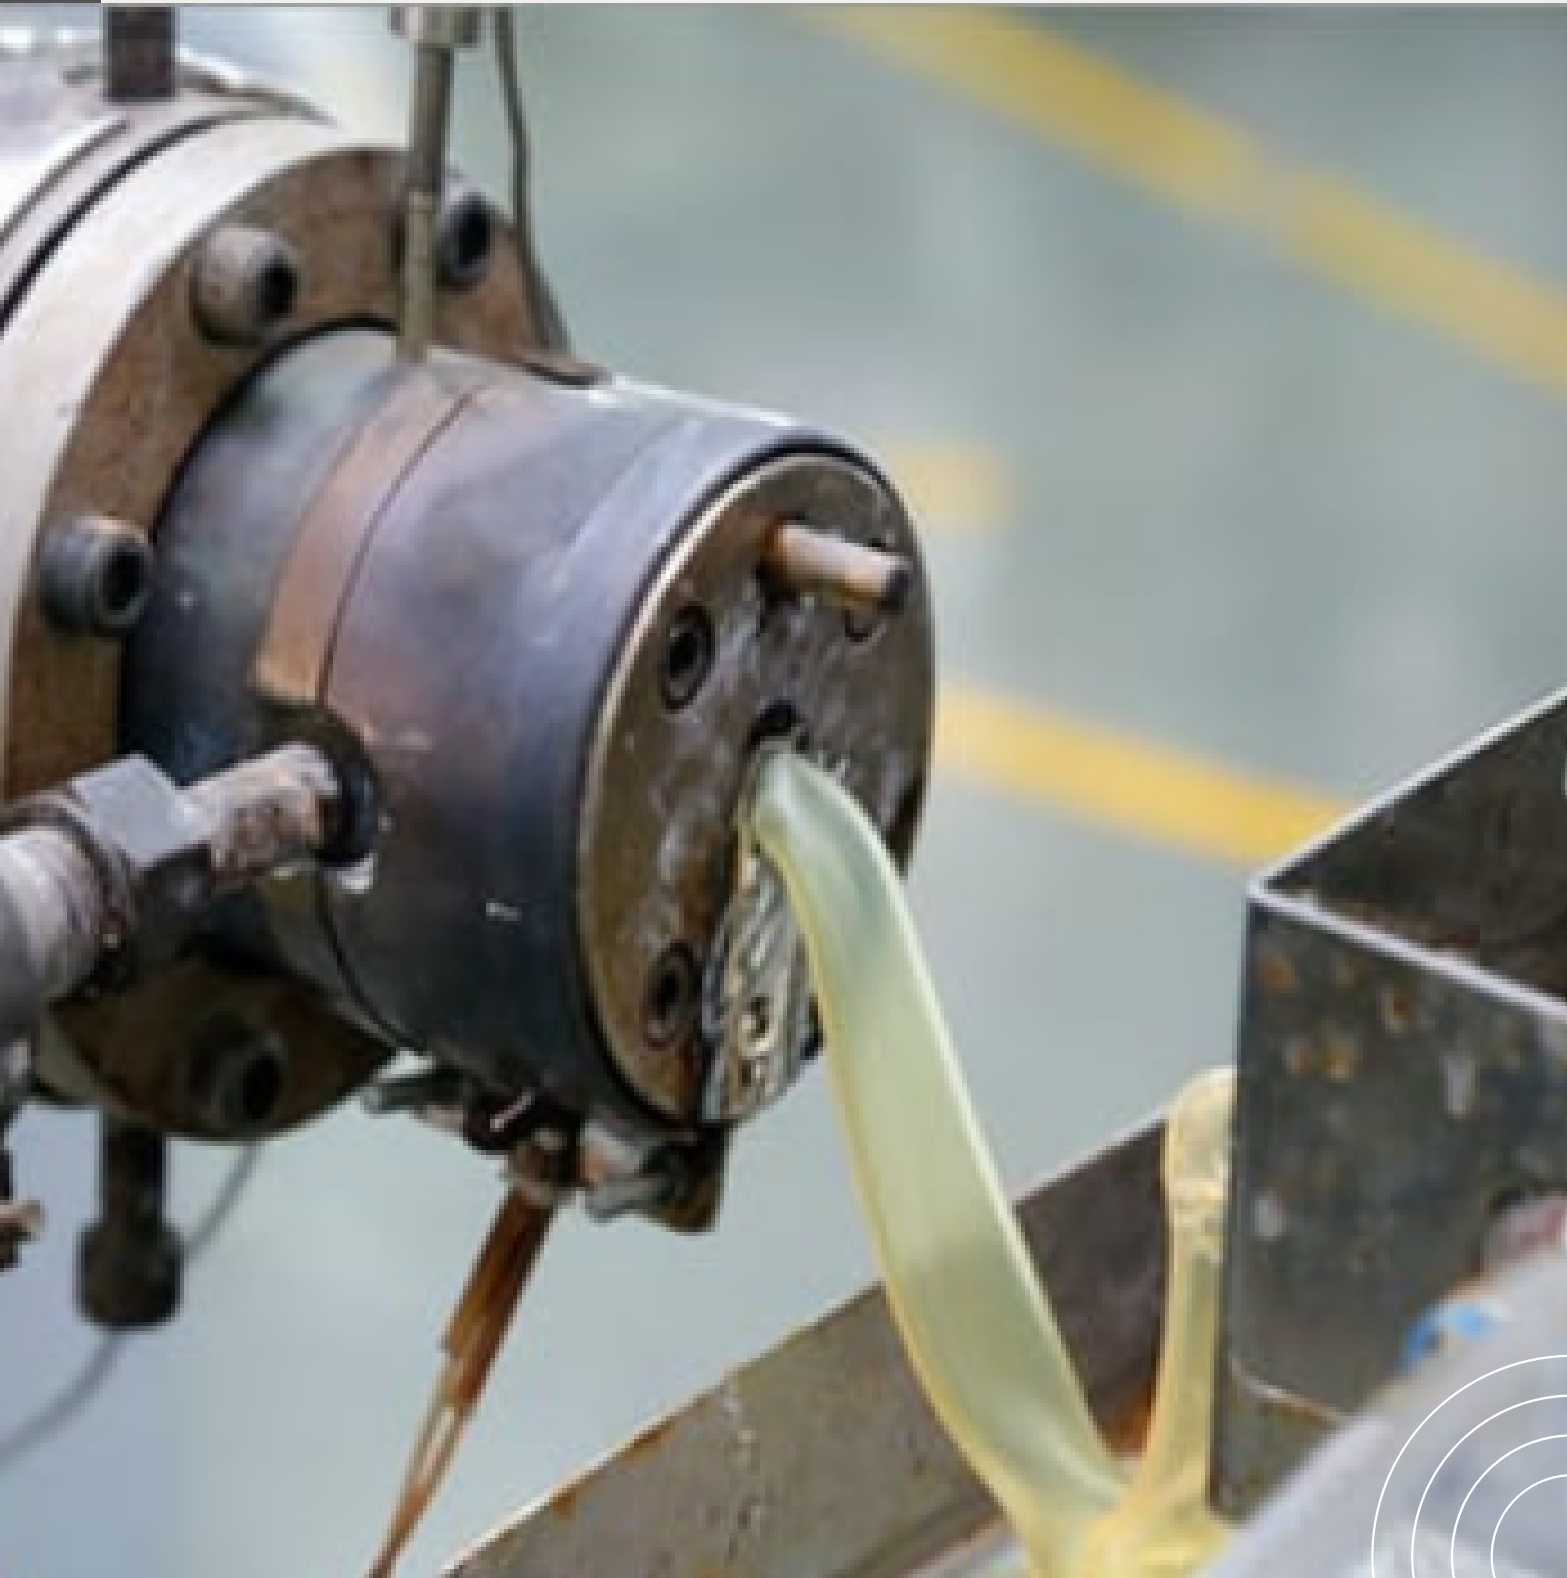

- Excellent functionality.
- Excellent

Auto Pencil Servo Cutter

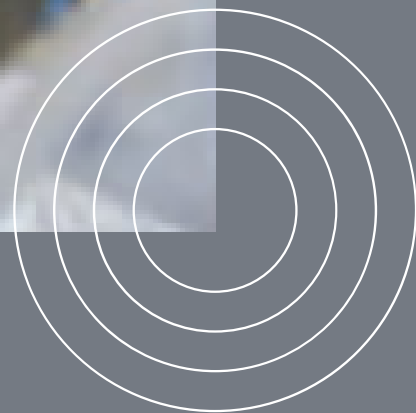

Servo Cutter is provided with one knife action to cut pen barrel to its correct size it can be used to set various different sizes of pen barrel Length It is driven by 1.5 KW AC servo motor Panasonic make Motor and drives to set the size of pen barrel and match the line speed of the Caterpillar Cutting rate up to 120 cuts/minute in on intermediate mode and up to 300 cuts/minute in continuous mode PLC Base control panel

Any Type Of Extrusion Die

Extrusion dies are essentially thick, circular steel disks containing one or more openings to create the desired profile. They are normally constructed from H-13 die steel and heat-treated to withstand the pressure and heat of hot aluminum as it is pushed through the die.
